

3D DESIGN DRAWINGS

MORE ACCURATE

Accuracy to the mm is achievable with 3D drawings and Draftech's visual project walkthroughs provide a realistic illustration of the final product, meaning site mistakes are minimal, particularly when all personnel on the job have access to the files for project collaboration through our cloud system.

LESS HASSLE

Alleviate the pressure of the unknown, like rising site costs, with 3D modelling. Issues are addressed before building and without costly meetings. Additionally, this can be done worldwide, 24 hours a day.

PROACTIVE PROJECT MANAGEMENT

Our 60+ years of experience means that our team can efficiently manage your project, eliminating costly mistakes. The use of detailed materials such as conflict reports, sleeve drawings, hanger, and insert drawings allow for a better look at "the big picture" and aid in reviewing, scheduling, and monitoring each project from beginning to end.

OUR SERVICES

- ▶ DESIGN DRAFTING
- ▶ BIM MANAGEMENT
- ▶ SPECIALISED PROJECT SYSTEMS
- ▶ REVIT DRAFTING
- ▶ AS BUILTS
- ▶ AUTOCAD DRAFTING
- ▶ MEP COORDINATION
